

EFA Multifunktionsverbinder (Einer Für Alle)

Das variable Verbindungssystem aus hochfestem Kunststoff, zum Klipsen, zum Einhängen oder zum Verriegeln. Mit EFA können die verschiedensten Verbindungsarten je nach Einbausituation umgesetzt werden und dabei ist es möglich, kleine Ungenauigkeiten auszugleichen.

Zum Fixieren werden $\varnothing 4,0$ oder $\varnothing 4,5$ mm Senkkopfschrauben verwendet.

EFA Multi Function Connecting System

All mounting points exist twice and are self-locking. 1 even tolerate small inaccuracies because I am adjustable on both sides. This applies to my right, left, upper and lower side as well as for lay-on or lay-in constructions. There are also additional fixed points that allow you to easily secure the screwing position. My screws of choice are $\varnothing 4.0$ or $\varnothing 4.5$ mm countersunk-head screws.
